

COMMONWEALTH SCIENCE, TECHNOLOGY, ENGINEERING AND MATH (STEM) INDUSTRY INTERNSHIP PROGRAM

FIND COLLEGE/UNIVERSITY INTERNS

SPRING AND SUMMER 2014

ABOUT THE PROGRAM:

The **Commonwealth STEM Industry Internship Program (CSIIIP)** is an online system that enables companies to select and hire spring, summer and fall interns from a large pool of pre-qualified college and university STEM students throughout Virginia. Detailed student applications contain contact information, a writing sample, a resume, GPA, transcripts, and letters of reference. The online system provides a search tool companies can use to find the right candidates, whether by STEM major, skills, college or distance from their company.

CSIIIP is managed by the Virginia Space Grant Consortium (VSGC), which works with the partners shown below and in collaboration with Virginia's colleges and community colleges to provide the most expansive network of opportunities and contacts possible. **There is no cost for companies or students to use CSIIIP.**

HOW IT WORKS:

Companies can register now for participation and enter internship opportunities. Placements for summer internships are for 10 to 12 weeks, 20 to 40 hours per week, and at a minimum pay range of \$10 to \$15 per hour. Spring and fall work weeks will vary.

ADVANTAGES FOR PARTICIPATING COMPANIES:

- CSIIIP provides access to highly qualified students throughout Virginia.
- All student applications are pre-screened by VSGC for eligibility.
- CSIIIP's searchable database makes finding the right interns easy.
- Companies present offers directly to interns.
- Companies are able to co-brand existing internship programs with CSIIIP.
- Participation enables companies to evaluate potential full-time employees.
- A link to each participating company's website will be posted on the CSIIIP website.
- Positive media coverage from VSGC for participating companies.
- Participation in CSIIIP provides company awareness to the Virginia General Assembly and the Governor's office.
