

July HR Highlights

Performance Management Updates

Exciting news! We have signed the statement of work to implement PageUp's Performance Management module. The project will kick off in August. We will pilot the PM module with a few agencies for this year's performance cycle with plans to roll out Commonwealth-wide in 2025.

For this performance cycle, we have been working with VITA to implement a solution for this year. Using COVApps platform, VITA has developed the EWP – Job description and EWP – Evaluation forms. Training for the EWP – Job description will occur in late July/ early August with training on the EWP – Evaluation forms to happen in September.

We are excited to move this paper intensive process into an electronic form this year and implement further enhancements with the implementation of PageUp's Performance module. If you have any questions about this work, please contact [Ponnette Smith](#).
